"Easy Living Home
Elevators celebrates
16 years and still
going strong"

Easy Living Home Elevators is Australian owned and operated. Our company has been in operation since 1998, and during this time period has grown steadily. Today in our 16th year we have over 120 employees and growing!

Easy Living Home Elevators has achieved an outstanding reputation with over 7000 lifts in our maintenance system around Australia, mostly in private residential homes.

Our success over the past 16 years has been based on our reputation and commitment to provide an exceptional level of service and pride in the finished product.

In fact, 61% of our clients are repeat customers or are recommended through word of mouth, which is a testament to the level of quality we place on every project we undertake.

Easy Living Home Elevators draws on the knowledge of our experienced team. We pride ourselves in treating our clients as people, rather than numbers. Like you, we enjoy the satisfaction of things running smoothly and to plan within your project. We are recognised as one of the most progressive and innovative design lift companies in Australia.

Easy Living Home Elevators has the flexibility to meet all your structural, design and budgetary requirements.

We are proud to offer our extensive DomusLift range to suit your application and style, involving quality materials and prestigious lift designs to meet your every need and function.

The Easy Living Home Elevators philosophy is simple:

"The things that matter to you are the things that matter to us!"

When Quality Matters!

Quality is what makes our "DomusLift" standout from other types of home lifts in the market today. This world-leading equipment has been designed, engineered and manufactured in Italy. It has been specifically "built to last" and to date, it continues to deliver its promise of quality, reliability and safety, along with the latest in cutting-edge technology.

It's designed around the requirements of a residential property, maximising the usable space within your home. This combined with low maintenance and running costs, makes the DomusLift the most bought home elevator in Australia.

"We at *Easy Living Home Elevators* pride ourselves on providing the best quality and the best value. In the lift industry right now, there's a clear distinction between a product that's great value and one that's just plain cheap. Great value wins every time!"

Mr Robert Pizzie
Managing Director

Luxury

The DOMUSLIFT Difference

Customised to suit your home

Every DomusLift is custom-built and designed to fit almost anywhere within your home, both indoors and outdoors with minimum architectural impact and builder's works.

Available in over 90 design variations, make yours a focal point in a self-supporting glass shaft structure or incorporate it into the overall design of your home, into an existing or pre-built shaft.

No Crane Required

All our DomusLifts can be carried through landing entrance doors which means we don't need to crane the lift in from the top of the shaft.

No hold ups waiting for the lift to arrive, No street blockages and No crane hire costs which can run into thousands of dollars.

The world leading DomusLift is built to last!

Its design integrated and the most bought home elevator in Australia. The most amazing statistic is that there are over 27,500 DomusLifts installed in over 40 countries in the world market – and growing! You can be assured of the quality, reliability and back-up.

**"27,500 DomusLift owners
world wide can't be wrong"**

Space Saving

Our DomusLift is extremely space saving. A low 130mm pit depth, 2450mm headroom requirement and minimal footprint dimensions mean:

- > NO wasted space.
- > NO deep excavation.
- > NO ugly shaft protruding through the roof.

Even our tiny single phase self contained control cabinets reduce the lift area requirements, maximising the usable space within your home

Economical Maintenance

With over 7000 lifts in our maintenance system, we have the knowledge and expertise to offer you a tailored maintenance solution that provides you with the most economical price whilst ensuring continuous reliability.

Peace of Mind

Easy Living Home Elevators only install the best quality lifts. We are so confident on the quality of our products, we are actually the first lift company in Australia to offer 3 year warranties on residential lifts.

No Hidden Extra's

We at Easy Living Home Elevators pride ourselves on offering you a package with no "hidden" extras. What our competitors consider as options, we provide you as standard.

Whisper Quiet

The DomusLift range provides safe, ultra smooth and whisper quiet drive systems. We invite you to come and visit our showrooms with operational lifts on display, and put us on to the test.

The Challenge Still Continues.....

Back in 2006 we challenged ANY of our competitors to having a drive system that's as smooth and whisper quiet as ours. This challenge is still continuing 6 years on!

We have probably installed a DomusLift in your street or your neighbours home

Luxury

Italian Quality since 1966

The DomusLift is proudly designed, developed and manufactured in Italy. Safety is the most important aspect of our DomusLift and by manufacturing it in Italy, to the highest quality and safety standards; we know that we are providing you a superior lift product, built to last!

Unfortunately in recent years we have experienced growing concerns with the quality of imported elevators from some parts of the world, being rushed onto the market with very poor standards in quality control and safety.

A major fundamental problem is that these new lift manufacturers concentrate on superficial appearance, using

granite, glass or stainless steel. Yet the workmanship beneath is inferior, where after installation the lift corrodes or falls apart. These manufacturers don't believe in producing a high quality lift product for long term performance, costing you more time and money.

We don't leave anything behind except the competition.

Luxury

Green Solutions

Designed with the planet in mind

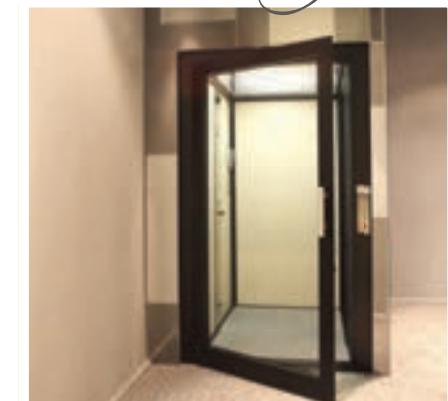

The DomusLift range has been designed with optimum energy conservation features, ensuring extremely low running costs.

- > 25amp single phase low power consumption, with the only energy required to push the lift car up, thus only using the same power as a small electrical appliance!
- > Reduced power start hydraulic system
- > Auto-off lighting system in the lift car, which is a car light timer to automatically switch the car light off after use to save power consumption.
- > Select LED downlights from our standard range of lighting, which last up to 50 times longer than halogen lighting and consume about 20% of the energy.
- > Ability to park at last point of destination to avoid unnecessary travels and waiting times.

> 100% biodegradable EcoOil: This biodegradable hydraulic fluid saves energy, lowers greenhouse emissions and assures maintenance reliability, easily replacing the traditional hydraulic fluid.

EcoOil fluid based on synthetic saturated esters, is zinc free and derived from renewable raw materials, with additives especially selected in order to obtain a non-toxic biodegradable product. Featuring higher performance than traditional fluids or other commercial biodegradable fluids, EcoOil lasts 3-4 times longer than traditional mineral oils.

Unlike conventional hydraulic lifts, the DomusLift is cleaner and easier to maintain without compromising on quality or features.

DOMUSLIFT

Awarded

Class A Energy Efficiency

Recently the Domus range of lifts was awarded an exciting "Class A energy efficiency" under the European Union energy label, bringing innovation into the home while helping to reduce the households' environmental impact.

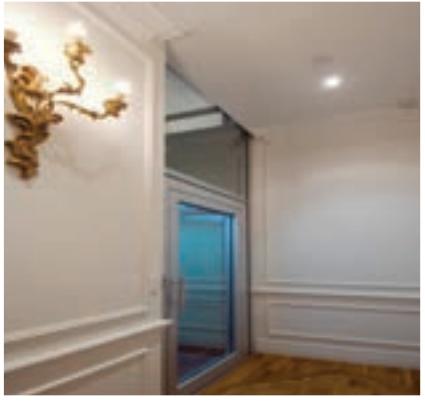

The DomusLift was tested at a standard rated load of 300kg and a nominal demand per year of 365 days of operation the rated value is 277,08 kWh.

Safety

Advanced lift safety for peace of mind

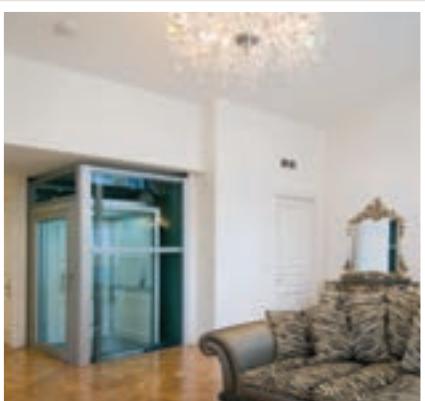

The DomusLift range has been developed with the paramount objective of providing users with the highest possible level of safety ensuring peace of mind.

Our standard safety features others consider optional extras, is what makes the DomusLift different from any other lift.

- > Integrated automatic emergency lowering battery system to allow the car to lower to the lowest floor and unlock the door in the event of mains power failure.
- > Emergency lighting - If an electrical power failure occurs the emergency light turns on and the control or call button corresponding to the lowest level lights up.
- > Full height light ray car safety entrance protection to the car door openings, for total passenger protection through the lift doorway.
- > Over speed sensing safety gear.

> Few moving parts to wear out, with very few moving parts you have the confidence of an extremely reliable and safe drive system.

> Electrical locks that make it impossible for the lift to travel away from the landing when the landing door is not closed.

> Mechanical locks that make it impossible for the landing door to open when the lift is not at floor level.

> A telephone is provided inside the lift in the event of an emergency, others can be contacted for help and the Easy Living Home Elevators 24 hour emergency service is programmed into the phone.

> Emergency Alarm Button, located in the operating panel, it is provided to alert surrounding persons in the event of an emergency.

Luxury

Why Easy Living Home Elevators?

- 1] Easy Living Home Elevators specialise in lifts for private homes.
- 2] Mr. Robert Pizzie, Managing Director of Easy Living Home Elevators has over 30 years industry experience. He has selected the best products available on the market and has done so using his technical experience and industry/liftcode knowledge....not just looking at the cost of the equipment.
- 3] A lift in a home is a purchase with an impact of over 20 years. Unlike a car, if you purchase a product you are not satisfied with; you can not trade it in and move on.
- 4] Our supplier IGV is in the top 500 companies in Europe. You don't get there without doing something right.
- 5] We are just around the corner. Prospective purchasers will appreciate the "local" presence and quick response if the unlikely need for breakdown assistance arises. For complete peace of mind
- 6] Our installers, maintenance and safety technicians are all employed and trained by Easy Living Home Elevators. What this means for you is that we have experienced, capable technicians who share our company vision for excellence in lift maintenance and customer safety.
- 7] As the residential lift market leader Australia wide, Easy Living Home Elevators are proud to be the only specialist Home Elevator Company meeting the toughest Australian and International Quality standards of ISO 9001.

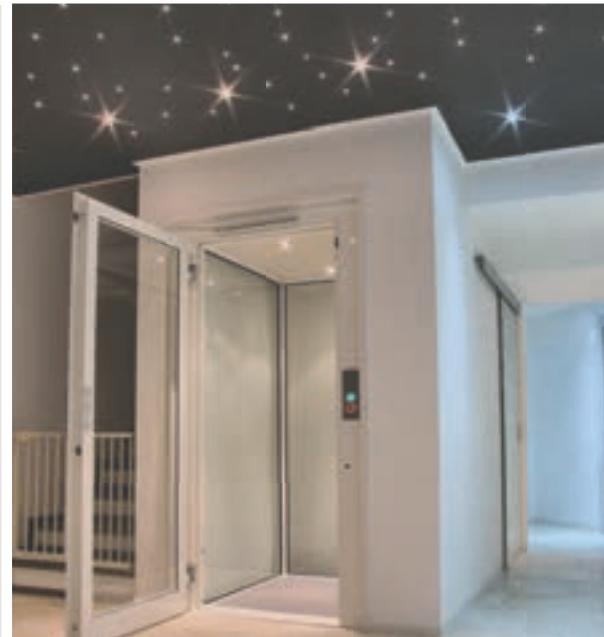

We have internationally recognized processes in place to ensure you receive the lift you want.....on time!

2 Elevators are installed, tested and handed over every day to happy clients.

- 8] We are very price competitive:
 - i. Easy Living Home Elevators take pride in producing very high quality products, meeting all our lead times and delivery dates - at extremely competitive prices.
 - ii. Easy Living Home Elevators only deal direct with our manufacturers, thus able to pass on our large savings to you.
- 9] We invite you to meet with our project team before you decide.....after all; they are the ones that you will deal with for the majority of the time.
- 10] We invite you to come and visit our state of the art showrooms and discover our quality and service at an affordable price.

Testimonial

“ We had a DomusLift installed in our new house by Easy Living Home Elevators. Right from the beginning, we have been impressed with the level of service and level of quality control. Easy Living Home Elevators were able to accommodate our special requirements resulting in a seamless integration with our building program and an impressive final product. Our work with Easy Living Home Elevators was one of the best experiences we had during our home building process. ”

Tony Rosail

Director (Windetc NSW)

Luxury

Service

It's all about the service

With every DomusLift purchase comes a philosophy of engineering excellence, quality and advanced technology. Easy Living Home Elevators delivers the technical expertise, special diagnostic equipment and genuine parts required to keep your DomusLift in optimum condition.

There is also an advantage knowing your DomusLift is maintained by qualified maintenance and safety technicians, all employed and trained by Easy Living Home Elevators.

Australia Wide Service

Easy Living Home Elevators have a network of technicians located across Australia to ensure fast guaranteed response rates arrival time to emergency calls in the residential lift market.

24/7 Call Centre Assistance

At Easy Living Home Elevators you not only get a home elevator, but a serious commitment from us, every lift installed has access to our 24 hour call centre.

Fast response rates

We are just around the corner
By using the latest technology and network of technicians located throughout Australia, Easy Living Home Elevators is able to offer the fastest guaranteed response rate to emergency calls in the residential elevator market.

The NavMan is a natural addition to our already high level of customer service. The capability of tracking every vehicle no matter where it is means that Easy Living Home Elevators is always able to dispatch the nearest technician, providing a more coordinated and efficient response service that keeps everything running smoothly.

As soon as a customer call comes in, our service centre can instantly match the nearest and most appropriate technician to the job, and provide an estimated arrival time, providing immediate peace of mind for our customers.

Genuine parts for peace of mind.

Easy Living Home Elevators takes pride in providing high quality genuine parts to meet the highest quality expected by our customers, which have been designed specifically for your DomusLift to ensure a perfect fit and superior performance.

Testimonial

“ On switching the service for our 4 lifts to Easy Living we were made aware of several issues on the first service visit that had been overlooked by the previous maintenance company ”

Leading the way in Glass Shaft Technology

Easy Living Home Elevators leads the market with over 2000 glass shafts installed around Australia.

Performance

> Made in Italy....built to last!

Architectural Feature

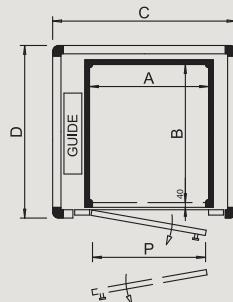

- > A visual high end architectural design, used to create a dramatic effect.
- > Provides views, natural light and a sense of spaciousness.
- > The tower frame is typically anodized aluminium or steel, which can be powder coated in over 260 colours.
- > Panels are available in glass, in a wide range of tints.

Design freedom

- > Overcome site limitations including views or the presence of a neighbouring building.
- > Greater design flexibility bringing out the best in projects from contemporary to classic, the newly built or renovated
- > Optimum utilisation of floor area, creating valuable use of what may otherwise be dead space.
- > Takes up less floor space than the masonry alternative. Each wall of an aluminium tower frame is only 50mm thick compared to the average masonry wall which is approximately 190mm thick on each side.

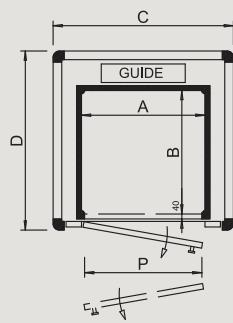

"An average overall cost saving of about 25% is achieved when compared to using the masonry alternative"

The More Powerful DomusXL Lift, Designed for Optimum Performance

The more powerful DomusXL Lift is a popular model, measuring 1100x1400mm (internal car size) and equipped with swing landing doors, it is an exceptionally spacious home lift with a lifting capacity of 400kg to accommodate four adults.

What sets the DomusXL Lift apart is its cutting-edge 2 speed drive system which is extremely energy efficient, operates almost silently and gives passengers a comfortable, smooth ride.

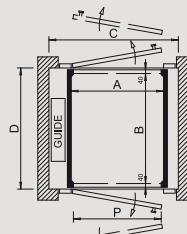

Customised to Suit your Home
All models are custom designed to fit in any location of the home, both indoors and outdoors and with minimal architectural impact and builder's works. Opt for a specially designed structural self supporting steel and glass tower, allowing the elevator to fit into small spaces. The DomusXL Lift is extremely versatile and has the flexibility to meet even the most demanding specifications, allowing it to cater to every individual need.

Designer Collection

Frameless Glass Doors

Easy Living Home Elevators raises the bar again introducing the ultra modern, sleek, clean line look, frameless glass swing door system which turns the elevator into a remarkable designer showpiece.

Whisper quiet and smooth in operation with a focus on strength and style, the "V1 Glass Doors" features the same European design and precision engineering you have come to

expect from Easy Living Home Elevators, featuring only the best materials to the highest standards.

The "V1 glass doors", appeals to designers and architects who value high quality lift solutions, with a focus on design to fully exploit the visual effect of glass and do justice to the elegance and transparency of the modern home.

DomusLift Light Touch Range

The stylish DomusLift light touch involves refined attention to detail from the innovative colour light scheme with polychromatic neon lighting, through to the high tech designed digital touch screen control panel framed by a metallic white plaque, which can also play MP3 files or be connected to the home automation system. (Upon request)

DomusLift Bisazza Glass Mosaics

A luxury line in collaboration with Bisazza mosaics, the Italian leading manufacturer of glass mosaics.

Offers an amazing aesthetical experience décor concept enhancing the DomusLift design by featuring the unusual application of glass mosaics.

This ultra modern, sleek, clean line look is designed to create an impressive feature within the home and will make a dramatic statement and a stunning work of art inside the DomusLift.

DomusLift Classic Luxury Range

The DomusLift Classic Luxury range was developed for those who love the warm and inviting wood grain atmosphere within their home décor.

This line was developed and designed to reproduce the effect of a classic and natural wood grain finish. The result is a stunning and amazing natural look.
